Ineff@childrenscause.org or 202.336.8221

Know the Story to Change the Story

- *46 children are diagnosed with cancer every school day in the United States - that's about two classrooms of kids.*
- *The incidence of invasive pediatric cancers is up 29% in the past 20 years.*
- *Cancer is the leading cause of death by disease in children under 15.*
- *In the past 20 years, only one new drug has been approved for a pediatric cancer.*
